

ePartslighting.com

We're a national, members-only source for the industry's best LED lighting, controls, and other ancillary products.

We offer factory-direct pricing and world-class customer service, providing:

- The convenience of ordering products 24/7/365
- Logistics coordination
- Lighting layout and calculations
- Rebate assistance

With many years of experience, eParts Lighting focuses on giving you what you want: stable and economical pricing on products, easily accessible on a user-friendly website.

This business was started because our team was tired of seeing overpriced products dominate the market due to the brand name associated with the product. We believed there was a better way. As time goes on, we're expanding our business, and adding more manufacturers to our growing list.

Find the latest LED lighting technologies, lighting controls, and more:
